Quiz: Get off the deep learning bandwagon and get some perspective

Question #1: Deep learning is the "silver bullet" that will solve all of our machine learning and image classification problems.

- A. True
- B. False

Question #2: Machine learning is...

- **A.** A methodology with a rational thought process entirely dependent on the problem we are trying to solve
- B. A set of libraries that perform black-box learning
- C. Overhyped and is not used in the real-world
- D. Something Al Gore invented

Question #3: You should research your problem before attempting to apply deep learning (or any other machine learning algorithm to it).

- A. True
- B. False

Question #4: What did Google's recent paper, Intriguing properties of neural networks suggest?

- **A.** Conclusive proof that deep learning should not be utilize din the real-world **B.** That deep learning is just a fad
- C. Deep learning is far superior to any other machine learning algorithm
- **D.** Purposely construct adversarial images with small pixel perturbations can dramatically hurt the performance of deep networks

Answers: Get off the deep learning bandwagon and get some perspective

Question #1: B

Question #2: A

Question #3: A

Question #4: D
